

NYNEX Mobile Communications

As the checkpoint communications operator, you have the task of assuring the relay of race information to our control center for disbursement to the media.

Massachusetts Track and Field and TAC (The Athletic Congress) people have been assigned to the checkpoints to record the top fifteen places and times of each division of runners (wheelchair, men, women, and masters) for relay to the press room. In addition longer lists of numbers will be taken for the security and integrity of the race. As each list of runners numbers and times is compiled please have them called in to 617 421 2448 or any of the additional numbers shown later (these numbers should probably be stored in your phone). As an assistance to you checking sheets are provided. Most of the officials would like to have you read the lists of top fifteen runners and times. If you do, numbers should be said individually digit by digit (Example 2043 is not said "twenty forty three" but should be said "two zero four three"). One other point which is important to note is, because of the extreme crowd noise there is atendency to shout, you should try to remember to speak very softly and cover the microphone.

You may be called upon to contact another official. I will attempt to give you a list of all the people they may need to contact and how to reach them. You should make sure you have the phone numbers of the other checkpoints.

Below is a list of the checkpoints and the officials:

1. Mile 5
 - A. M. Clancy, A. O'Brien, J. Ronayne
 - a. Route 135 Ashland 4 paces before(west) of entering Framingham sign on right.
